KAZ-TT INFERNO — Torches are an economical solution for applications requiring a safe torch effect. They can be used with standard propane tanks or with natural gas. The KAZ-TT INFERNO — Torches have electric ignition, automatic re-strike and incorporate a flame safeguard controller to ensure a reliable and safe light-off. They also comply with applicable codes and standards. The KAZ-TT INFERNO — Torches are available in a portable configuration for easy relocation, or a permanent configuration with a mounting base.

## KAZ-TT INFERNO Torches Operating Instructions

### **!!CAUTION!!**

These torches are designed and intended for outdoor use only.

**DO NOT** place under covered or enclosed patio or eaves.

**DO NOT** place under low hanging tree limbs or near shrubs.

**DO NOT** let children play around the torch.

Keep torch away from combustible materials.

1. Connect the **KAZ-TT INFERNO Torches** to a fuel source.
2. Apply 24V A/C power cord to switchable power source.
3. Turn on the **KAZ-TT INFERNO Torches**.

NOTE: A flame safeguard has been incorporated in the torch to monitor ignition and flame combustion. If the flame is extinguished by wind, rain or fuel starvation the unit will attempt a relight for 60 seconds.

After the torch is lit the ignition process is complete. If the torch does not light, turn the system off allowing the torch to reset. Try again in five seconds. If the torch does not light check the fuel source and make sure all valves are open.

### **Repair and Maintenance**

This system should only be repaired by KAZ Fire Effects certified personnel. To maintain warranty, no repair services can be performed by non-qualified personnel. Periodically use soapy water to check all gas connections for leaks and test function of moving parts.

**CAUTION:**

- Propane is heavier than air which causes it to accumulate in low areas. Be certain all areas are well ventilated.
- Propane has a distinct odor. If you smell it, immediately discontinue work, extinguish all flames, find the leak and correct it.

**WARNING:**

Use extreme caution at all times. You are using an intense open flame. Disregard of safe practices can result in severe fire damage, serious personal injury or death.
